AvediaStream o7500 Origin Server

The AvediaStream Origin Server greatly increases network video system flexibility by delivering video to a very wide range of clients, both in and outside the wired LAN.

Interfaces

- Two 802.3 10/100/1000 Ethernet (RJ-45) sockets

Inbound Streams

- Single program MPEG-2 transport streams (ISO/IEC 13818-1)
 - RTP
 - UDP
 - IP unicast
 - IP multicast via IGMP
- RTMP (FLV container)
- RTSP
- HLS (HTTP Live Streaming)

Output Streams

- Streaming up to 2 Gbps/2000 clients
- Single program MPEG-2 transport streams (ISO/IEC 13818-1)
 - RTP
 - UDP
 - IP unicast
 - IP multicast
 - IGMP Join Group for enhanced switch compatibility
- RTMP (FLV container)
- HLS (HTTP Live Streaming) single streams
- HLS Adaptive Bitrate (ABR) multi-streams

Outbound Channel Management

- Channel announcement via SAP/SDP
- Multicast/unicast address selection (automatic or manual)
- Configurable name, number and group membership

High Availability

- Two Origin Servers can be configured in a cluster to provide high availability of live streams using a failover mechanism.

Management

- Flexible network port configuration enables streaming and administration interfaces to be on separate networks
- Fully integrated with Exterity management tools
- Network administration via SSH and SNMP
- HTTP web interface (supported browsers: Firefox, Internet Explorer and Chrome). Check with support@exterity.com for version information
- Serial RS232 Admin Port
- Event logging via Syslog (local and remote)
- Firmware upgrade & configuration backup/restore via TFTP
- Access via VGA monitor and USB keyboard/mouse

Network

- Linux IPv4 stack
- DHCP or Static IP addressing
- 2 x IEEE 802.3u 10/100/1000Mbps MDIX Ethernet interface
